Data-based Building Performance Assessment (1720955)

The seminar aims to introduce students to the practical and conceptual domain of building performance assessment using real data from buildings. Different data collection and data analysis methods will allow a practical evaluation of buildings' energy consumption and indoor environmental assessment. The seminar proposes evaluating real case-studies energy, comfort, air quality and lighting through monitoring campaigns and surveys. To achieve a comprehensive understanding of building assessment, the course will also share some events with the seminar Little Tools - Large Effect". 

Erster Termin: 13.04. 14 Uhr
Regeltermin: Dienstag 14-15:30 Uhr
Prüfung: 10.08.
Dozenten: Andreas Wagner, Isabel Mino
Art der Veranstaltung: Seminar
Sprache: Englisch
